HOWDY FROM THE FORSTERS

FR

We are proud to celebrate our Annual Production Sale with you. We have been providing the industry with reputable genetics for 59 years. I would like to give an extended thank you to all our friends/customers, and family who make this possible for us.

This is our third year doing an Online Auction Only Sale. It's going to go through DVAuction, and you **will need to register prior to bidding at www.dvauction.com**. The bulls will be available for viewing in their pens from February 10-15, 2026 at the Forster Ranch. If you are unable to make it in this time frame, you are more than welcome to stop by the ranch at any time to view them. **Bidding will open on Tuesday, February 10th at 8:00 am MT and will close Sunday, February 15th at 4:00 pm MT**. Extended bidding will start at 4:00 pm MT or 5 minutes prior. This means if there is a bid at 3:55 pm MT, bidding will stay open on ALL lots for another 5 minutes. This will continue until no more bids are being placed. There must be a 5-minute period with no bids before bidding closes. We are happy to take bids for individuals that are not able to do so on their own or need help with the bidding process.

These bulls were born in late spring of 2024 and weaned in November with no creep. (I'D LIKE TO NOTE THAT WEANING WEIGHTS WERE DOWN DUE TO POOR GRASS QUALITY THAT YEAR). They are put on a high roughage diet until spring. The calves are then turned out to pasture like summer yearlings. Prior to the sale we will supplement them some to get ready for sale day. Our bulls are grown out and NOT finished out. Forster Red Angus believes this will ensure a better breeding bull that will have less maintenance and breed more cows for a longer servicing career. We have a lot of customers that continue to compliment us on how well our bulls stand up and how long they last.

If any of you need help in your selection, feel free to let us know and we will be more than willing to help you out in any way we can. You are also more than welcome to stop by the ranch and view our cattle at any time.

We look forward to seeing you at the sale!

Sincerely,

Ken Forster & Family

"OUR CATTLE ARE A PART OF WHO WE ARE, NOT JUST WHAT WE DO."

➤ GENERAL INFORMATION ➤

ABBREVIATIONS AND EXPLANATION OF TERMS

C.Ease-Calving Ease Code: Calving ease continues to be a concern for those breeding heifers. WE have tried to provide as much information as possible with EPD's, actual birth weights and a star code system. The star rating for each bull is based on the best information we have available on both individuals and their close relatives. Remember to take into consideration your own cow herd genetics, environment, feeding conditions, etc., will have a big influence on your birth weights.

* **Use on cows**

** **Use on cows or growthy heifers**

*** **Few calving problems should occur when bred to first calf heifers**

HB: The probability of developing profitable cowherd traits while maximizing the value of marketed progeny.

GM: The probability to increase the value of marketed calves.

Act. BW: The animal's actual birth weight.

BW Ratio: The ratio of an animal's BW to the others in its birth contemporary group, 100 being average.

Adj. WW: Weaning weight adjusted 205 days.

WW Ratio: The ratio of an animal's AWW to the others in its weaning contemporary group, 100 being average.

YW Ratio: The ratio of an animal's AYW to the others in its yearling contemporary group, 100 being average.

ADG Ratio: Is the gain from WW to YW and compared to others in their yearling contemporary group, 100 being average.

SC: Actual bull's scrotal measurement in centimeters.

Ultra Sound Carcass: Scan data taking as yearlings for IMF:R, RIB:R, and Back Fat.

% IMF:R: Is the marbling ratio, compared to others in their yearling contemporary group, 100 being average.

REA:R: Is the ribeye ratio compared to others in their yearling contemporary group, 100 being average.

FAT:R: Is the back fat ratio compared to others in their yearling contemporary group, 100 being average.

MPPA: Based on Dam's past productivity. For example, a cow's MPPA for weaning ratio is calculated from the cow's average progeny weaning ratio, the number of her progeny with weaning record, and the repeatability of weaning weight.

TERMS AND CONDITIONS

Terms: Cash and settlement must be made immediately after the sale.

Disputes: The auctioneer will settle any disputes as to bids and his decision on such matters shall be final.

Handling: As sale is affected, all animals will be maintained at the purchaser's risk.

Announcements: Any of these made sale day take precedence over printed material.

Semen Interest Retained: This means purchaser buys the bull for what he bids and gets 100% possession and 100% resale value of the bull when he decides to sell him. It does give Forster Red Angus the option to collect, use and market semen from the bull and does not restrict purchaser from doing the same. The revenue from semen sales will be shared by the parties with semen interest after the cost of collecting and marketing of such semen. This collection, unless agreed to otherwise, would be done at the expense of Forster Red Angus and the purchaser's convenience.

Seller's Semen Rights: A 1/2 (one half) semen interest will be retained in all bulls by seller. In the event if seller elects to collect semen from a designated bull, it will be done at seller's expense during such time when purchaser is not using the bull for breeding. On all bulls the buyer receives full possession and full salvage value.

FERTILITY TEST: These bulls are guaranteed breeders. They have all passed a breeding soundness evaluation, including a semen test by a certified veterinarian.

Dam's Age: The dam's age at the time of calving.

CED: The calving ease direct EPD is the probability that an animal's calves will calve unassisted to a two year old dam.

BW: The birth weight EPD is measured in pounds of weight differences at birth.

WW: The weaning weight EPD is measured in pounds of weight difference at a 205 day weaning age.

YW: The yearling weight EPD is measured in pounds of weight difference at 365 days of age.

Milk: The milk EPD is the weight difference at 205 days which can be attributed to the milk production and female characteristics of the daughters of the animals.

TM: The total maternal EPD is the total weight difference at 205 days which can be attributed to the dam of an animal alone.

ME: Mature Cow Maintenance Energy Requirement- Predicts cows who have lower energy requirements and will eat less than cows with higher requirements at the same level of production. Low numbers are desirable.

HPG: The heifer pregnancy EPD measures the percent probability that an animal's daughters will calve, as a two year old.

CEM: The maternal calving ease EPD is the probability that an animal's daughters will calve unassisted as two-year olds.

STAY: The stayability EPD is the probability that, after an animal's daughters enter the cowherd, they will remain productive until at least six years old.

MARB: The flecks of intramuscular fat (marbling) is the rib eye muscle between the 12th and 13th rib. Marbling is the most important factor in determining quality grade and is associated with product palatability.

REA: The rib-eye EPD is the difference in square inches in the size of the longissimus muscle (the ribeye muscle, as measured at the 12/13 rib) of an animal's progeny. It is a component in the calculation of carcass cutability or yield grade of percent retail beef.

BFAT: The backfat EPD is the difference in inches in exterior fat thickness in the progeny of the animal. In carcasses, it is measured at the 12/13 rib for ultrasound measurements. It is the most important component in the determination of cutability or yield grade of percent retail beef. It also represents fat which may need to be trimmed off.

Guarantee: Bulls are guaranteed breeders. All claims must be submitted in writing to the seller with seven months of sale date, along with semen evaluation and health report, at buyer's expense, from a certified veterinarian. Seller shall have the privilege of trying the bulls after his return before making an adjustment. This guarantee is void if there is evidence of improper management in caring for the animal, or the bull's inability to breed is due to sickness or injury which was incurred after being sold. Heifers are guaranteed to be open and are Bangs vaccinated.

Health Certificates: Will be furnished anywhere in the U.S.A.

Liabilities: All people who attend the sale do so at their own risk and the owner and sale management assume no liability, legal or otherwise, for any accidents which may occur.

Contracts: The above terms and guarantees shall constitute a contract between the buyer and seller of each animal sold.

Default: In the event the Buyer defaults on payment, the Buyer shall be responsible for all costs, including attorney's costs, incurred by Sale Management or Seller in connection with collecting, or attempting to collect, payment due.

Delivery: Free delivery on bulls immediately following the sale to central sale barn locations in North Dakota and adjacent states. Beyond that, delivery at cost only. Forster will help arrange for shared trailer loads to central locations and prorate the loads at cost. We try to arrange deliveries to accommodate as many buyers as possible, but it is impossible to schedule perfectly. Please try to understand. Forster normally will deliver most cattle.

HOW DOES DVAUCTION, ONLINE AUCTION WORK?

This means that bidders will be able to preview the lots online with complete information, including Pedigree, EPDs, and video, for several days prior to the sale. During that time, bidders can leave a maximum bid, which the system will represent confidentially up to that amount. Bidders can also bid incrementally, as the bid advances prior to the close.

**All lots for this event will close at the same time. If a bid is placed within 5 minutes of the closing time, closing times for that event will be extended 5 minutes for all lots after that bid. This continues until no bids are placed for 5 minutes.*

For general questions to set up account please contact DVAuctions office at: 402-316-5460 or support@dvauction.com

****HIGH SPEED INTERNET ACCESS REQUIRED**

REASONS TO BUY FROM ONLINE AUCTION

- 1 Shop at YOUR Convenience**
- 2 NO Pressure** – View bulls, go home, and decide what to bid on
- 3 View Bulls at Forster Ranch** on YOUR time from February 10-15, 2026
- 4 Easy Access** to Forster Ranch
- 5 Weather is LESS Concerning** – 6 days to view bulls & bid
- 6 Watch & Bid Online for FREE** on www.dvauction.com

WATCH AND BID ONLINE FOR FREE!

Online Registration required at www.dvauction.com PRIOR to sale

Visit WWW.DVAUCTION.COM
for online bidding, catalog, and video of the bulls.

Watch & bid online for FREE at

DVAuction

Broadcasting Real-Time Auctions

Bid from home with DV Auction's "real-time" internet bidding service!

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab and watch our online bidding tutorial
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make you purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? Call Tami at (308) 870-3661 or email tami@dvauction.com
Our full-time support team can also always be reached at (402) 474-5557.

Domain is a wide topped, long bodied bull with depth of rib & flank. He is thick made. His progeny are exhibiting the same traits. His sire is in the Genex line up. He produces easy fleshing cattle with muscle. The daughters are medium sized, easy fleshing cows with good feet and fantastic udders! Domain's dam side has some greats in her pedigree like Red Hill 845 & Beckton Julian B571. They are easy keeping, good gainability genetics.

RED ANGUS MARKETING PROGRAMS

How to Enroll in Angus Access & Allied Access

1. Contact the Red Angus value-added department at **940-477-4593** and complete a short supplier enrollment questionnaire over the phone. RAAA staff will ask general management, animal identification and breeding questions. If needed, the producer may be asked to supply additional documentation on breeding such as semen receipt, lease agreements or information on purchased females.
2. After all documentation is recorded, staff will ship the tags directly to the producer who must tag the calves before they leave the ranch of origin – birth, branding, preconditioning, weaning or before loading on the semi.
3. The producer will receive a customer enrollment agreement to fill out and return to RAAA with a copy of their calving records.
4. Staff will issue the USDA-approved Certificate of Compliance upon receiving the customer enrollment agreement and calving record.

EID Tags are required for program identification. Outside-purchased EIDs can be brought in for \$1 per tag.

- Traceability to at least 50% registered Angus bloodlines
- Source verified to ranch of origin
- Group age verified
